

Sabrina Heydel

AI Product Builder & Full-Stack Digital Systems

From the business problem to a deployed, production-ready system: product discovery, UX, architecture, data, APIs, automation, QA and deployment.

ABOUT

I own digital products end to end, autonomously: framing the business need, choosing the architecture, designing the UX, modelling the data, wiring APIs and automations, then testing, deploying and instrumenting what I ship.

My focus is business usefulness rather than technology for its own sake: connecting front-end, database, APIs, automation and observability into tools that teams actually adopt, save time with and can maintain.

FEATURED PROJECTS

Challenge → Solution → Role → Stack → Impact

01 TalentFlow AI		CASE STUDY
BUSINESS CHALLENGE Recruiter workflow is fragmented across ATS, notes, email and separate AI tools. MY ROLE Product Discovery · Workflow analysis · UX · Information architecture · Front-end architecture · AI-assisted development · QA · Analytics instrumentation · Deployment & documentation	SOLUTION DESIGNED Bilingual recruitment workspace · Pipeline · Dashboard · Candidate intelligence · Interview preparation · Copilot UX · Guided demo · Product analytics STACK Next.js React TypeScript Webflow Cloud GitHub PostHog AI-ready architecture	
IMPACT One coherent product workflow replacing several disconnected interfaces, shipped as a credible public beta.		
02 Real Estate Platform & CRM		CASE STUDY
BUSINESS CHALLENGE Agencies scatter acquisition, qualification, pricing and sales follow-up across disconnected tools. MY ROLE Business Analysis · Product Discovery · UX · System Design · Data Modelling · Supabase / RLS · Server authorization · Automation logic · QA · Demo architecture · Deployment	SOLUTION DESIGNED Public real-estate experience · Property search & interactive listings · Lead qualification forms · Loan & rental calculators creating CRM leads · CRM pipeline with lead scoring, notes, assignment, next actions · Appointments & property matching · Admin/demo roles with RLS and isolated sandbox · Simulated follow-up actions, feedback capture and analytics STACK Lovable React / TanStack TypeScript Supabase / PostgreSQL RLS APIs Brevo GitHub	
IMPACT The website becomes an operating system for acquisition, qualification and sales follow-up — not just a showcase.		
03 Melissa Breathwork		CASE STUDY
BUSINESS CHALLENGE Create an international digital ecosystem for a solo practitioner. MY ROLE UX · Customer Journey · Copywriting · Automation · Training	SOLUTION DESIGNED 3-language website · Booking · CRM · Newsletter · Lead magnet · Brevo automation · Training & handover STACK Lovable Brevo Cal.com	
IMPACT An autonomous acquisition and booking system across three languages. Client project · public testimonial available.
